Spot Weld Tensile Tester

- Portable
- 18.5" wide, 4" deep, 7" high
- 5000 lbf capacity
- coarsely serrated grips
- steel plate construction
- maintenance free operation
- two year warranty

digital force display

- LCD
- Record data manually or by computer with standard RS-232 output
- Displays current and peak forces in pounds, newtons or kilograms
- RS-232/20 mA serial output
- 17025 certified calibration

Please note this is a manually operated machine. It should also be noted that a simple 1/2" chuck variable speed hand drill can be attached to the input shaft to speed up testing procedure.

Price (q'ty=1): \$7,125
